[Chambers and Partners®](#) rankings are based on independent research into the top law firms worldwide by over 200 researcher analysts who conduct thousands of interviews. The legal directory ranks law firms and individual lawyers in bands. According to Chambers, being ranked in any band is a significant achievement.

To determine the ranking, qualities assessed include technical legal ability, client service, depth of the team, commercial vision and business understanding, diligence, and value for money — ensuring strong support at all levels. Individual lawyers are ranked by practice area based on their legal knowledge and experience, ability, effectiveness, and client service. Law firm rankings are listed by department, not the firm as a whole. Chambers judges according to feedback from client and attorney interviews and by assessing recent work.
