

Health Care Data Privacy and Security Fundamentals Published in EDGE Magazine

Cal Marshall recently authored "[Health Care Data Privacy and Security Fundamentals](#)" in [EDGE magazine](#). In the sponsored article, he discusses key regulations including HIPAA and HITECH that apply to health care providers and some vendors rendering services to health care providers. Some of these vendors include law firms, accounting firms, and information technology (IT)-related businesses. Cal also outlines the necessary steps a business must take to comply with privacy and security regulations and explains the importance of training and equipping personnel.

Cal is a shareholder in the [Health Care](#), [Business](#), and [Cybersecurity and Data Privacy](#) groups at Chambliss. He is passionate about informing and preparing his clients. For details on Cal's practice and his experience with regulatory matters, [please visit Cal's bio](#).
