

Electronic, Medical, and Other Devices

Electronic and medical device manufacturers must understand legal and regulatory issues affecting the way they do business. These manufacturers trust Chambliss for its innovative solutions, responsiveness, and multidisciplinary and pragmatic counsel. Our electronic and medical device manufacturing clients turn to us for advice on matters relating to business formation, financing and incentives, business planning, corporate governance, general corporate, real estate, labor and employment, intellectual property, mergers and acquisitions, litigation, and environmental and regulatory compliance. Drawing upon interrelated practice areas and a comprehensive understanding of clients' businesses, industry insights, and trends, our team can offer solutions from everyday legal needs to more complex, bet-the-company matters.

Experience

Successfully prepare and prosecute patent applications for a local medical device manufacturer

Successfully prepare and prosecute patent applications for Controls Division of local manufacturer

Successfully prepare and prosecute trademark applications for multi-national manufacture of road construction equipment

Successfully prepare and prosecute trademark applications for local stove manufacturer
