

Capital Equipment and Materials

From purchasing or installing machinery, robotics, piping or upgraded software, it can be challenging to navigate the acquisition or installation of capital equipment and materials. With a multidisciplinary approach and a clear understanding of clients' businesses, Chambliss uses its experience in this area to assist companies in meeting their business objectives. Chambliss works closely with their clients' legal, financial, procurement and engineering groups to identify the key issues relating to structure (purchase or lease), pricing and payment, and integration with other equipment and suppliers. Particular focus is given to warranties, indemnification, damages, and limitation of liability, intellectual property, and confidentiality.
