With backgrounds in architecture, city planning, and engineering, the Chambliss construction team uses real world knowledge to advise on construction, design, and development matters. We provide counsel for a full range of clients, including owners, lenders, developers, general contractors, subcontractors, suppliers, design professionals, and sureties. Our multidisciplinary background in design and construction save our clients time because we already speak the language and understand the drawings and contracts.

We often assist our clients with contract drafting, negotiation, litigation and dispute resolution, liens, bonds, and other payment remedies.

Additionally, we have consulted on LEED standards, sustainable design and construction, and building information modeling (BIM). Our team has the experience and resources necessary to tackle any situation, no matter the level of complexity. We are proactive in assessing risks and will work closely with our clients to reach their goals.

Our group is actively involved in several industry associations including the Associated General Contractors of America, American Institute of Architects, Construction Lawyers Society of America, and Tennessee Association of
