For over 20 years, Chambliss attorneys have secured and protected intellectual property around the globe. Clients, ranging from individual inventors to emerging companies to publicly traded multi-national organizations, rely on our team for prompt, tailored solutions guided by our wide-ranging industry experience.

In today's global economy, intellectual property has become an increasingly valuable asset – the most valuable asset for some. Our team includes registered patent attorneys with backgrounds in engineering who have helped clients identify, protect, defend, and enforce their intellectual property rights in the U.S. and in numerous foreign jurisdictions. We are efficient and cost-effective and have capabilities in substantially all the major areas of intellectual property law including patents, trademarks, copyrights, and trade secrets. We constantly adapt strategies and advice to address the new challenges of the ever-changing age of technological innovation.

To better serve our clients and provide the most strategic advice, we have developed sound knowledge of our clients' innovations, businesses, and industries. Many of our clients are leading innovators in the manufacturing, consumer products, 3-D printing, software, financial, health care, information technology, and sports and wellness industries. We are collaborative in our approach and enjoy building relationships along the way. Our attorneys routinely provide in-house training for our clients and present educational seminars to industry groups, advertising agencies, and corporations.
